GRANDSTREAM EXPANDS VIDEO SURVEILLANCE OFFERING WITH NEW IP DOME CAMERAS

GXV3611 DOME CAMERAS WITH REAL-TIME H.264 VIDEO STREAMING FOR HIGH DEFINITION/LOW LIGHT CONDITIONS DELIVER MAXIMUM SECURITY PROTECTION WITH REMOTE MONITORING CAPABILITY

BROOKLINE, MA (FEBRUARY 10, 2010) – Grandstream Networks, the leading manufacturer of IP voice/video telephony and video surveillance solutions, today strengthened its IP video surveillance portfolio with the introduction of the GXV3611_HD (720P high definition) and GXV3611_LL (low light) progressive scan CMOS fixed dome IP surveillance cameras. Retail stores, restaurants, campuses, casinos, apartment buildings and business offices looking for a cost-effective, open standard surveillance solution can easily implement these two new indoor cameras for 24x7 security protection of people and assets. With SIP/VoIP support, business owners can also stream all monitoring activity to a mobile or video phone, from anywhere in the world, using the GXV3611's 2-way audio and video streaming capability.

“With demand for cost-effective video surveillance solutions rapidly growing, these two new fixed dome high definition/low light cameras give our business customers more options for solving their mission-critical video monitoring needs,” said David Li, CEO of Grandstream. “As with all the models within our surveillance portfolio, these new cameras are competitively priced and offer bi-directional SIP/VoIP calling capabilities with Grandstream’s entire IP voice and video products.”

Unobtrusive, Attractive Dome Cameras for High Definition/Low Light Conditions

Grandstream’s GXV3611 indoor fixed dome IP cameras provide an unobtrusive indoor solution that can be easily mounted on walls or ceilings for maximum surveillance protection.

Ideal for advanced surveillance requiring razor sharp image clarity and archived video used for investigative purposes, Grandstream’s **GXV3611_HD** camera includes 2-Megapixel progressive scan CMOS sensor and advanced lens while delivering multi-rate H.264 real-time video streaming with a maximum resolution of 1,600x900 and at frame rate of up to 25fps. Using GSurf, Grandstream’s free video management software, businesses can monitor and control up to 36 cameras simultaneously.

The **GXV3601_LL** captures and streams high quality real-time video under low light conditions (as low as 0.05Lux) and up to 30fps with full D1 (720x480) or VGA (640x480) resolution. It features multi-rate H.264 video compression with excellent image quality and can control up to 36 cameras using GSurf video management software.

Additional GXV3611 Standard Features

- Integrated microphone, speaker and smoke detector for maximum and out-of-the-box video + audio + smoke monitoring using industry standard SIP & VoIP technology
- Motion Detection and Alert Notification

- Integrated Power-over-Ethernet (802.3af)
- 24MB pre-/post-event recording buffer
- Easy installation and management using Grandstream's web-based graphical user interface

Cost-effective Solution That Integrates with IP-PBX and IP Video Endpoints

Grandstream's GXV3611 IP dome cameras have built-in support for SIP/VoIP and 2-way audio. SIP/VoIP essentially turns these cameras into smart camera phones for video monitoring and 2-way audio intercom/monitoring. Live video feeds from any of Grandstream's surveillance cameras can also be routed through Grandstream's GXE502x IP PBX and streamed onto Grandstream's IP video endpoints like the GXV3140 for a completely integrated, cost-effective network solution.

Pricing and Availability

The GXV3611_HD and GXV3611_LL will be available in March, 2010 through Grandstream's worldwide distribution channels at a list price of \$389 and \$289 respectively.
